

CELLMAX

GROWING BETTER EVERY DAY

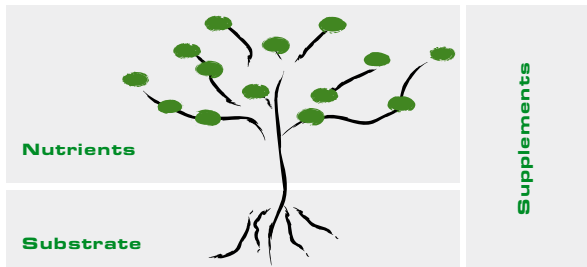

BIO GROWING

BIO GROWING

The philosophy behind Bio Growing is actually very simple: you consciously choose natural products because they help you achieve a good result without burdening the environment.

Another advantage is that the use of organic food and supplements in cultivation means a lovely sweet taste of the end product. After all, Bio Growing is the only right choice for starting growers. There are two reasons for this: cultivation on soil requires less of an investment and is easier, because you do not need measuring instruments. To make it even easier for you, Cellmax Soil Mix contains all the nutrients required for the first six weeks.

Cellmax has two other cultivation systems aside from Bio Growing, namely Hydro Growing and Coco Growing. Ask your supplier about the possibilities.

Substrate this is the subsoil you use for the cultivation. There are two groups: organic (soil) or hydrologic (coconut, mineral wool, etc.).

Nutrients nutrients ensure that your plants can grow. Without nutrients there is no yield.

Supplements you can give your plants an extra boost and protect them from diseases and parasites by choosing from the supplements.

Substrate

Cellmax Soil mix

Soil to which a balanced amount of nutrients have been added, so that your plants do not lack anything for the first six weeks. You only have to water them! Cellmax Soil Mix has a stable pH. Airing and drainage are perfect due to the airy structure of the soil.

Nutrients

Cellmax Bio-Organic

Cellmax Bio-Organic Grow*

Best product tested when it comes to quality and the size of the yield. All ingredients are purely natural: the NPK (nitrogen, phosphor, potassium) is extracted from algae and seaweed.

* Cellmax Bio-Organic Grow is unnecessary when using Cellmax Soil Mix.

Cellmax Bio-Organic Bloom

100% natural, 100% effective: Cellmax Bio-Organic Bloom guarantees an explosive fruit development and a lovely sweet taste.

Supplements

Cellmax Root Booster

Roots are important: they ensure that your plant absorbs water and nutrients. The amino acids in Cellmax Root Booster guarantee swift growth of the roots in the initial phase. The trace elements and vitamins keep the roots healthy and strong. Root Booster also offers protection against diseases affecting the roots.

Cellmax Flower Stimulator

Would you like a lovely sweet taste and be surprised by the yield? Use Cellmax Flower Stimulator! This natural food supplement improves the absorption of nutrients, so that your plant becomes healthy and strong. Flower Stimulator increases the effectiveness of the photosynthesis, and as a result your plant bears more fruit. The result: a higher yield.

CELLMAX GROWING BETTER EVERY DAY

Cellmax has a simple basic assumption: what is good, can be better. That is why we are always looking for ways to optimise our products. However, we do more than simply deliver good food and supplements: we also give growers tips and advice. Our Growers Guide (see below) is the reference guide for beginner and advanced growers.

THE GROWERS GUIDE

Cultivation is an area of expertise. There are many factors that influence the yield. All the questions from beginner and professional growers are answered in The Growers Guide, the handy guide produced by Cellmax. Request the guide from your supplier, or download the PDF from cellmax.nl!
