

## Supplements

### Cellmax **Leafspray**

A plant not only absorbs nutrients through the roots, but also through the leaves. Capitalise on this opportunity with Leaf Spray, a supplementation to the basic food with trace elements and vitamins. Your plant grows strong, evenly and acquires a high resistance to fungi, viruses and other plagues.

# CELLMAX

GROWING BETTER EVERY DAY

## HYDRO GROWING

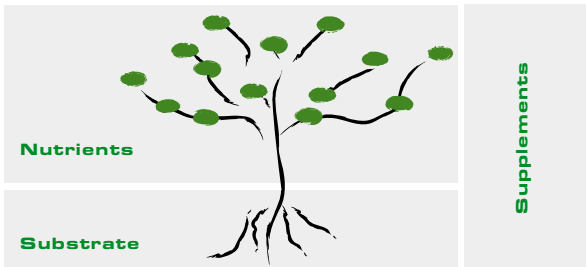

## HYDRO GROWING

**Would you like the highest possible yield per square metre and are knowledgeable in this area? Then the choice is easy: Hydro Growing.**

With Hydro Growing you can perfectly regulate the pH and EC value thanks to the measuring instruments you apply. In this system, you work directly with the plant roots, so that everything you add has a direct effect.

*The system for experienced growers.*

Cellmax has two other cultivation systems aside from Hydro Growing, namely Bio Growing and Coco Growing. Ask your supplier about the possibilities.

**Substrate** this is the subsoil you use for the cultivation.

There are two groups: organic (soil) or hydrologic (coconut, mineral wool, etc.).

**Nutrients** nutrients ensure that your plants can grow.

Without nutrients there is no yield.

**Applications** you can give your plants an extra boost and protect them from diseases and parasites by choosing from the supplements.

## Nutrients

### Cellmax HydroGrow

Give your plants everything they need to become healthy and strong, give them Hydro Grow. Extra nitrogen has been added to stimulate growth in the first phase and to promote a beautiful green colour.

### Cellmax HydroBloom

Vitamins, minerals and a well thought-out NPK-ratio: Hydro Bloom is the food for the flowering phase. It makes your plants strong and stimulates the fruit development. This will become apparent to you when harvesting!

## Supplements

### Cellmax Root Booster

Roots are important: they ensure that your plant absorbs water and nutrients. The amino acids in Cellmax Root Booster guarantee swift growth of the roots in the initial phase. The trace elements and vitamins keep the roots healthy and strong. Root Booster also offers protection against diseases affecting the roots.

### Cellmax Flower Stimulator

Would you like a lovely sweet taste and be surprised by the yield? Use Cellmax Flower Stimulator! This natural food supplement improves the absorption of nutrients, so that your plant becomes healthy and strong. Flower Stimulator increases the effectiveness of the photosynthesis, as a result of which your plant bears more fruit. The result: a higher yield.

## Supplements

### Cellmax PH +/-

Regulating the pH, to ensure your plants extract everything from the costly food?

Cellmax makes it easy for you. pH- Growth, pH- Flowering and pH+ ensure an optimal pH, from beginning to end.

### Cellmax PK Booster

Boost the fruit development of your plants with PK Booster: extra doses phosphor and potassium guarantee a higher yield.

## **CELLMAX** GROWING BETTER EVERY DAY

Cellmax has a simple basic assumption: what is good, can be better. That is why we are always looking for ways to optimise our products. However, we do more than simply deliver good food and supplements: we also give growers tips and advice. Our Growers Guide (see below) is the reference guide for beginner and advanced growers.

### **THE GROWERS GUIDE**

Cultivation is an area of expertise. There are many factors that influence the yield. All the questions from beginner and professional growers are answered in The Growers Guide, the handy guide produced by Cellmax. Request the guide from your supplier, or download the PDF from [cellmax.nl](http://cellmax.nl)!
